

HOW TO PLAY

- Place light bulbs in the white cells so that every white cell is illuminated.
- Each bulb shines horizontally and vertically until it reaches a black cell.
- Two bulbs cannot shine on each other. Numbers show how many bulbs must touch that black cell.

Akari - Solution

HOW TO PLAY

- Shade cells so that no number appears more than once in any row or column.
- Two shaded cells cannot touch horizontally or vertically.
- All unshaded cells must remain connected.
